Course Requests Instructions for SKYWARD

1. Log on to Skyward using your username and password (contact Counseling if you have forgotten this information).

This is the screen you will see.

CLICK HERE
Courses for 2012-2013

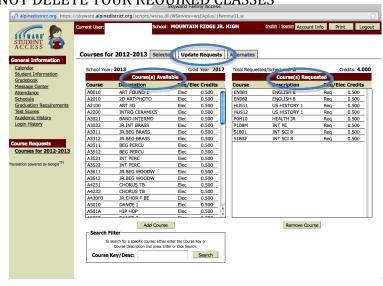

This is the screen you will see a second to the second to th

2. This screen shows you the classes you have selected. We have enrolled you in the required classes. Math will be adjusted after testing scores are available. If you have tested for Academy classes, you will be put in regular classes until we get the official lists from the

district.

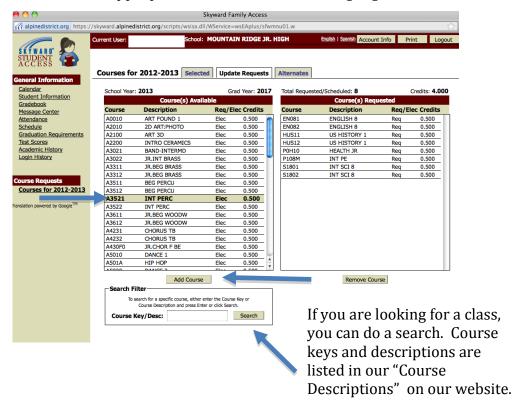

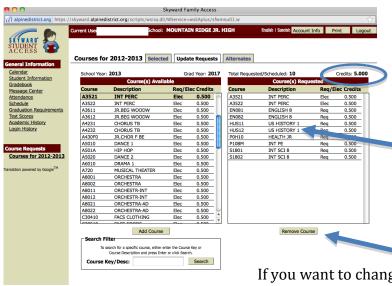

3. To make a class request, click on the "UPDATE REQUESTS" tab. This is the screen you will see. On the left are "available" classes, on the right are "requested" classes. DO NOT DELETE YOUR REQUIRED CLASSES

4. To select a class, click on the appropriate class. The class will highlight. Click the "Add

Course" button

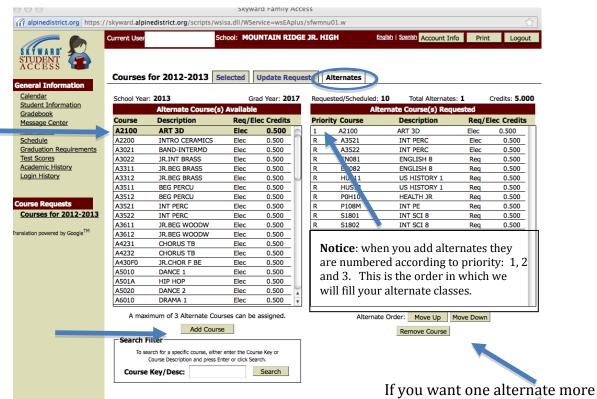

When you have selected a class it will show up in the list on the right side. Notice the required classes have "REQ" listed in the third column. Electives say "ELEC".

If you want to change a class, highlight the class you want to remove and click "Remove Course"

After you have selected the correct amount of electives and have a total of **8 credits**, you will need to select three additional elective credits as alternates. ONLY CHOOSE HALF CREDIT CLASSES FOR YOUR ALTERNATE CLASSES. Alternate classes will be used if there is a conflict in your schedule. Choose only the classes you are willing to take as there is a chance that you may be placed in one of them.

5. To choose Alternate classes, click on the tab that says "Alternates".

As before, highlight the course you want to take and click "Add Course"

If you want one alternate more than another, highlight the class and click "move up" or "move down" depending on the priority order you wish.

6. When you have finished selecting all of your classes and alternates, you may view your requests by clicking the "Selected" tab. Your requested classes will be at the top of the list and your alternates will be listed at the bottom.
