As a former member of a Salt Lake County fire department we would visit local elementary schools multiple times per month. These visits would provide the opportunity to interact with school administration, teaching staff and students. During these visits I realized the important role an adult leader can play in the success and confidence of a child.

I feel that the guidance we provide our children as young adults in junior high might be the most important time to create solid fundamentals that they can rely on in preparation for the bigger world ahead.

I hope to have the opportunity to contribute and cooperate with other council members in making sure our children receive every opportunity to succeed!
