Early Out Mondays: What Do Teachers Do?

Teachers at Frontier Middle School meet every Monday to discuss fundamental areas that will enhance the educational process and academic achievement for students at Frontier Middle School. While teachers meet, the Four Essential Questions of a Professional Learning Community are followed. The philosophy of the Four Essential questions is to determine instructional direction.

The first fundamental question teachers define is what they expect their students to know. Using

Utah's core curriculum, teachers meet with cohorts to determine the essential areas on which they will

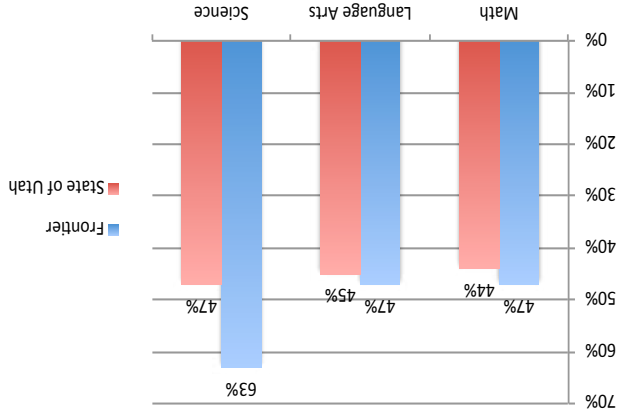

focus their instruction. This focus drives their teaching in a clear, concise way.

The second fundamental question that teachers ask is how they will know when students have learned the information presented. After a thorough discussion and presentation of materials, teachers will form assessments based on their core curriculum to measure the progress of their students.

The third fundamental question addresses what teachers do when it is determined that a student has not learned. After collecting data from assessments, teachers discuss interventions that can be used to re-teach and provide opportunities for their students to master the subject matter in their classes. A major piece of the intervention process is our Flex time during the school day.

The fourth fundamental question that teachers define is how they will enrich and extend the learning for students who are already proficient. After collecting data, students who show proficiency are provided enrichment activities that allow for additional growth and understanding in the subject matter.
